

e-IDC's Digital Workplace

The New Tool of Your Trade:

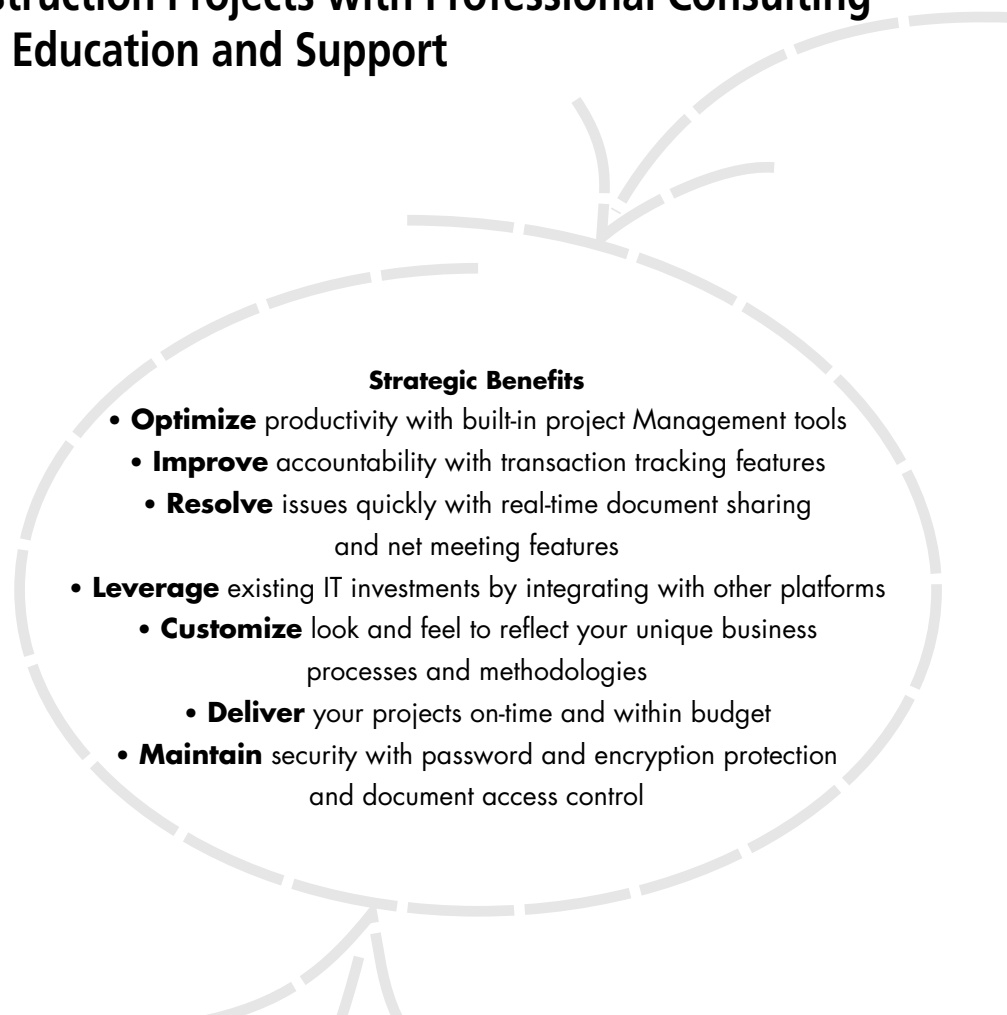

Empowering Your Construction Projects with Professional Consulting Services – Deployment, Education and Support

The e-IDC Digital Workplace

The e-IDC Digital Workplace is a dynamic, web-based environment that securely stores all project documents and communications. Designed by Construction Professionals for Construction Professionals, the Digital Workplace connects and integrates all project members, including the project site, into the collaborative process. It is designed from the ground up around the way people work, enabling distributed teams to work on complex projects within and across enterprises. Accessible via the Internet utilizing today's latest encryption technologies, the Digital Workplace provides protection for your important documents and communications.

A Customized AEC Solution

The Digital Workplace was designed and developed with flexibility in mind – the flexibility to adapt to unique business processes and methodologies, and to leverage existing enterprise IT investments. Built upon a leading technology and Industry-proven eRoom software platform, the Digital Workplace optimizes communications to deliver your projects on-time and within budget. e-IDC utilizes its industry experience to customize the Digital workplace to address the needs of the AEC Industry and to reflect your unique business processes, while providing a familiar user-friendly graphical interface.

Strategic Benefits

- **Optimize** productivity with built-in project Management tools
- **Improve** accountability with transaction tracking features
- **Resolve** issues quickly with real-time document sharing and net meeting features
- **Leverage** existing IT investments by integrating with other platforms
- **Customize** look and feel to reflect your unique business processes and methodologies
- **Deliver** your projects on-time and within budget
- **Maintain** security with password and encryption protection and document access control

Beyond Technology: Solutions in Context

With the scale, scope and complexity of today's mission-critical business processes, technology alone is rarely a silver-bullet solution. That is why e-IDC is committed to understanding your business requirements, challenges and strategic objectives. With the aid of e-IDC's professional consulting services, the Digital Workplace will yield immediate corporate, project, and end-user benefits, transforming technology into a powerful solution.

e-IDC Core Capabilities: Unique Business Solutions

- Aggregating available proven technology solutions
- Requirements gathering and strategic analysis
- Complex project planning and management
- Solution design, development and customization
- Custom integration and consulting engagements

e-IDC's mission is to utilize and aggregate technology to improve productivity and empower the Architectural, Engineering, and Construction (AEC) Industry. We utilize our industry experience and technology partnerships to produce user-friendly, effective communications solutions. e-IDC's Digital Workplace is built upon the best-in-breed Documentum/eRoom software platform, and is customized for the Design and Construction Industry to connect and enable project members, optimize productivity and deliver your projects on-time and within budget.

About eRoom and Documentum

eRoom, a division of Documentum, provides a digital workplace for the extended enterprise, allowing organizations to quickly assemble a project team wherever people are located and manage the collaborative activities that support their complex and rapidly-changing business projects and processes. Documentum's eRoom Collaboration Technology is utilized by Fortune 500 Companies such as Hewlett Packard, The Ford Motor Company, Boeing, Pfizer, Siemens, Verizon and many others.

Documentum is the leading provider of content management solutions, with the proven experience and superior technology that uniquely qualifies them as content management experts. With offices around the world and serving more than 2,500 of the largest businesses, Documentum has established a tradition of excellence in meeting customer requirements since its founding in 1990.
